

## August 19<sup>th</sup>, 2004 multiple sightings

### **Twin Cities, MN - August 19, 2004 - 09:00-20:00 hrs. (Central)**

A very large, unidentified white object hovered over the Twin Cities area for approximately ten hours. No one, including the FAA or NWS, could identify the object.

*KSTP am radio 1500 had callers regarding object in the sky, very very high but clearly visible. must have been a huge object. some said weather balloon but according to eyewitness news the FAA has not got a clue and neither does the National Weather Service. I can't believe that the FAA does not know what it was. after all. it was there in plain sight for many to see. It is video recorded-no rational explanation to this day*

### **Arizona North of Phoenix in the Evening**

Large Object sits motionless in a 30mph wind. Many driver in the area pull over. Multiple red illuminations are seen and recorded on video tape around the object

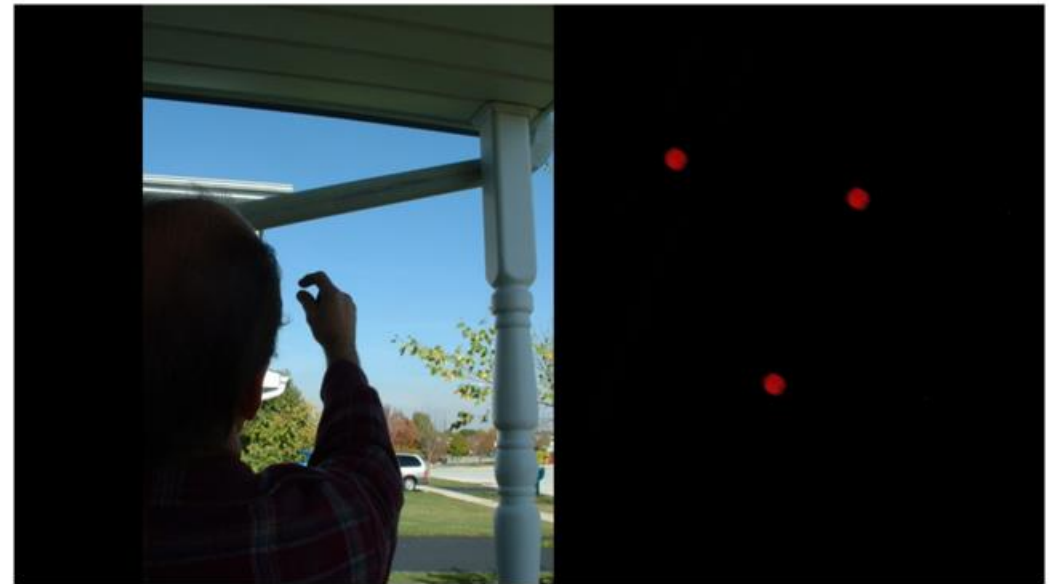

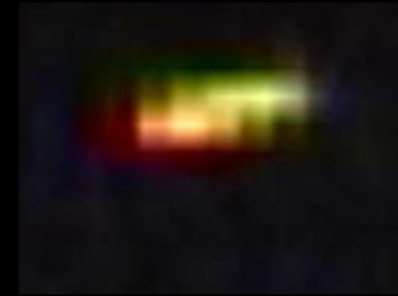

**10:00pm**

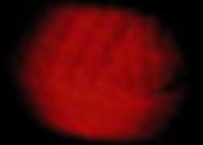

Orland Park  
Looking East  
Three Red Lights  
No Noise  
No Air Traffic

Approaching from  
S/SW  
10:50 PM CDT  
August 21, 2004

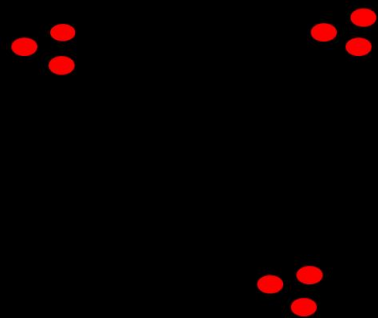

Variations of the individual Illuminations from selected videos  
Different types of cameras

It was noted by Apparent Witnesses In the Historic Tinley Park Area that they were seeing a total of **Nine Illuminations THREE** together in a triangular pattern. 08/21/2004

- Animal Reactions
- No air traffic
- Two-way radios not working, i.e., Nextel and walkie talkies, home monitors
- Hundreds of calls into Police and 911 Centers in multiple municipalities
- Seen over the area and from miles away
- Brighter and larger than aviation lights and stars
- Smaller objects seen leaving and going back to the original configuration
- Other characteristics visible while directly under the object
- Sightings in other locations during the same time frame within a few days
- Major local news coverage, yet no official explanation was ever given
- Another Somewhat Similar object is seen 45 min later
